**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 101***

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 22 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. This claim is directed to a "use" which is non-statutory subject matter.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-9 and 11-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Imuta et al. US 2002/0156207.
4. The rejection set forth under 35 USC 103 in the paper mailed 7/2/07 is deemed proper and is herein repeated.
5. The newly amended claims and remarks filed in support thereof have been fully considered but have been found not persuasive.
6. The claims are now limited to those fillers which have been intercalated with a quaternary ammonium compound and intercalating agent. The examiner maintains that the cited art anticipates or renders obvious this limitation. The document at [0090]+

teaches using the fillers that have been treated with treating agents comprising quaternary ammonium salts. Given the breadth of the claims and the lack of specific intercalating agents claimed, this teaching is seen to read on the claims as now presented. Further, this patent teaches the use of treated clays at [0946]+. These clays can be treated with salts and other agents. These are seen to read on the claimed treatment as well.

7. Applicants then argue that the claims are directed to nanofillers which are not identified in the art. This is not persuasive. The claims have no particle size limitation. The art is not limited to fillers having a specified particle size. As such, it is reasonable to presume that the fillers used in the art can overlap those claimed. There is no showing of unexpected results with respect to the claimed particle size of the filler.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter D. Mulcahy whose telephone number is 571-272-1107. The examiner can normally be reached on Mon.-Fri. 8-4:30.
